

COMMUNITY DRUG ALERT

November 15, 2023

Increase in drug poisonings (overdoses)

- There has been an increased number of overdoses/drug poisonings (44 reported cases) from November 7th to November 14th, along with 2 suspected deaths.
- The Drug Checking Program at the Kitchener CTS recently detected 2 fentanyl samples containing ketamine.
- Ketamine is an anesthetic and painkiller used primarily in veterinary surgery.

IF SOMEONE OVERDOSES:

1. Call 911.
2. Administer naloxone if an opioid drug poisoning is suspected.
3. Perform rescue breathing and/or chest compressions.
4. Do not give any other substance(s) because this can make the drug poisoning worse.
5. If no improvements, continue to give naloxone 2-3 minutes apart until paramedics arrive.
6. If you have to leave the person unattended, put them in the recovery position.

IF USING SUBSTANCES:

- Never use substances alone. If using with a friend, do not use at the exact same time or use the National Overdose Response Service (NORS) at 1-888-688-6677.
- Try a small amount first and use less drugs when your tolerance may be lower.
- Avoid mixing substances – do not use other downers (e.g. benzos, alcohol, and other opioids).
- Have naloxone ready and know how to use it.
- Use at the Consumption & Treatment Services (CTS) site at 150 Duke Street West (Open 7 days a week, 9am-9pm, 8:30pm last call). Drug checking services are also available at the CTS site. Visit <https://sanguen.com/drug-checking-program/>
- Anyone who is involved in a drug poisoning including the person needing help and anyone at the scene is protected from simple possession charges if you call 911 by the Good Samaritan Drug Overdose Act.
